

Instructions for Use / Technical Data Sheet

CAIRCON - Deep Primer

Product description

Deep primer regulates absorbency and consolidates and primes sandy, porous and highly absorbent mineral substrates such as render, plasterboard and concrete. It is also suitable for masonry, fibre-cement boards, gypsum fillers, chalking old coatings, and washed surfaces formerly painted with distemper, indoors and outdoors. Its high penetration makes our deep primer particularly suitable for wall and facade paints.

Our deep primer is easy to apply, reduces and equalises substrate absorbency and is therefore the optimum pre-treatment for substrates.

Substrate preparation

substrates must be sound, clean, dry and free from grease. Remove loose material such as wallpaper residue and mask switches and sockets. Wash chalking substrates with a pressure washer. Treat heavily soiled substrates with **Special Pre-Cleaner** first.

If third-party products are used for substrate preparation, verify their compatibility and a satisfactory final result by preparing a test area BEFORE coating. No liability can be accepted for improper application results when third-party products are used.

Application instructions

Stir well before use. Do not apply below +5°C. Apply evenly and undiluted with a brush, surface brush or ceiling brush. Treat the substrate until it is saturated and no longer absorbs primer. Do not spray using airless equipment. Do not mix with other products. Once dry, no glossy film should be visible on the substrate. Clean tools immediately after use with warm water and household cleaner.

Technical data

- Composition: special synthetic dispersion, water, additives, preservatives
- Colour: milky white
- Form supplied: liquid
- pH value: approx. 7
- Recoatable: after approx. 10-12 hours
- Coverage: approx. 7 m²/L

Warnings and safety information

Hazard pictograms: Not required

Signal word: None

Hazard statements: None

Supplemental hazard statements: None

Precautionary statements:

- **P101** If medical advice is needed, have product container or label at hand.
- **P102** Keep out of reach of children.
